WORKSHOP 3

Hand-drawn personal data visualization

Take the data you collected individually in the last three weeks. Translate this data into different little handdrawn infographics. Just make use of graphical elements like colour, lines, abstract forms, symbols etc. to tell your story/translate it into a comprehensive unity. Add a title and a legenda if necessary.

Exchange the handdrawn infographics with your international group. Let him/her read/interpret your infographics. Decide together which data you want/could to combine for assignment #4.

Dear Data
